SUMMARY

Software Engineer with 1.5+ years of experience building scalable, performance-driven full-stack applications using React.js, Next.js, and Node.js. Experienced in developing real-time systems, AI-powered applications, and data-intensive platforms with strong focus on performance, system design, and user experience. Built production grade systems including AI chatbots, trading platforms, and data visualization tools. Passionate about solving complex problems, optimizing systems, and building high-impact products end-to-end.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Python

Frontend: React.js, TypeScript, Next.js, Redux, Tailwind CSS

Backend: Node.js, Express.js, FastAPI, REST APIs, WebSockets, JWT Authentication,

Databases: MongoDB, PostgreSQL

SEO & Rendering: Meta Tags, SSR, CSR, ISR

Performance Optimization: Debouncing, Code Splitting, Performance Tuning, Light House Score.

Currently Exploring: Distributed Systems, System Design (CAP Theorem, Load Balancing, DB Sharding, Message Queues)

EXPERIENCE

[TRADEBRAINS.IN](#) | Software Engineer

October 2025 - Present

[Tradebrains Portal](#) - (Next.js, CSS Modules, WebSockets) - [LiveDemo](#)

Oct 2025 – Dec 2025

- Contributed to a **stock research and analysis platform** where I built an AI chatbot with **context-aware session memory and streaming responses**, reducing AI reply latency from **5-7 seconds to ~1.5 seconds** and capable of analysis of stocks and its past performance.
- Improved application performance by **25% (Lighthouse score: 62 => 84)** by implementing route-based code splitting, optimizing LCP through WebP image compression, and reducing Total Blocking Time by deferring non-critical scripts.

[72CRYPTO.COM](#) - (Next.js, CSS Modules, WebSockets) - [LiveDemo](#)

Dec 2025 – Present

- Architected and engineered a **high-performance cryptocurrency trading terminal**, delivering advanced tools for futures and options traders.
- Built a **real-time market data layer using WebSockets** and a custom API client to synchronize live order books, market feeds, and user balances.
- Implemented **secure session management using Next.js middleware and JWT refresh tokens**, enabling secure user authentication.
- Improved trader workflow by providing an **integrated platform for strategy creation, automated execution, and real-time PnL monitoring**.

[SIRPI.IO](#) | FullStack Developer

December 2024 - September 2025

[URAI – AI Chatbot as a Service](#) - (React.js, Tailwind CSS) - [LiveDemo](#)

Dec 2024 – Feb 2025

- Took complete responsibility of Frontend, **AI powered chatbot** that integrates into any website via script tag.
- The chatbot is a **RAG model** capable of **answering user queries based on the content of the website provided**.
- Architected **microservice based approach** to inject the chatbot script into client sites.

[ADeX – Geospatial Data Visualization Platform](#) - (React.js, E-charts) - [LiveDemo](#)

Apr 2024 - Oct 2024

- Enhanced and optimized** a large-scale data visualization tool for displaying geospatial information across datasets.
- Collaborating and mentoring** with two interns, handling **project planning, code quality**, and feature implementation.

[Legacy Code Refactoring](#) - (FastAPI, MariaDB, Heroku)

Apr 2024 - May 2024

- Played a role in converting **legacy Flask** backend code into **FastAPI's modular microservices**. Maintained **several FastAPI routes** and implemented robust **test cases**, improving reliability and maintainability of the codebase.

[ALERP – ERP Dashboard & Resource Management](#)- (React.js, Tailwind CSS) - [LiveDemo](#)

Feb 2024 – Apr 2024

- Co-developed an ERP system in a team of four, **taking ownership of ~50%** of the frontend.
- Built **dynamic Excel style tabbed** views to display **real time data**, including **live status updates** and inline **cell editing**.
- Boosted UI **performance** by **30%** by implementing **debounced search, pagination**, and **reusable component** design.

[Visa Approval Portal for Seminar Students](#) - (React.js, Tailwind, Netlify)

Mar 2024 – Apr 2024

- Proposed and implemented** a custom portal to streamline visa status checks for **2500+ international** seminar attendees.

[Goltdev Technologies](#) | Full Stack Development Internship

Jun 2024 - Oct 2024

- Crafted an activity log page with Node.js and React.js to track application activities, enhancing efficiency and zero downtime

Personal Projects

[Stock Ticker APP](#) - (Next.js, Tailwind CSS, Chart.js) - [Repo](#) - [LiveDemo](#)

- Implemented a stock app using Next.js, Chart.js with **SSR** to enhance **SEO**, improve performance, and deliver real-time **data visualization**.

[Knowledge-Base-Centric-RAG](#) - (Python, LangChain, Google_GenAI, Streamlit) - [Repo](#) - [LiveDemo](#)

- Built a RAG using **LangChain**, and **Gemini's API**, enabling knowledge base querying with improved accuracy and **contextual** responses.
